THE PERFORMA™ MEDIA FILTRATION SYSTEMS

INTRODUCING a simple

Whole home media filter systems are designed to provide your home with better tasting, purer water, while also removing the undesirable substances that may be present in problem water. These systems remove such substances as iron, rust, odor, acids and excess chlorine. When teamed-up with a water conditioner and drinking water filtration system, you can be sure that your family has the best water available for the best value. These systems not only improve your water, they improve your way of life!

How A Quality Water System Benefits Your Family:

In the Kitchen

- No more undesirable sulfur or chlorine odors in drinking water
- Purer, better tasting, filtered drinking water at your tap eliminates the need for expensive bottled water from the store or delivered to your home
- Purified water improves the taste of juice, coffee and soup
- Ice cubes are clearer and harder
- Dishes and china sparkle, using less dish soap
- Iron stains in your kitchen sink disappear

In the Bathroom

- Soap makes more lather
- No more iron-stained bathroom fixtures
- Water no longer has any odd odors when you take a shower
- No more chlorine residue on your skin or in your hair after taking a shower
- Hair is softer and more manageable
- Soap scum and residue buildup on showers, tubs and sinks is reduced

Plumbing and Appliances

- Increase water heater efficiency and life with no iron build-up
- Iron stains and odors on clothing and on plumbing fixtures are reduced
- Clothes and linens are cleaner, brighter, softer and last longer
- Life is added to dishwashers and washing machines

ING treatment *for Better Water*

Whole home water filter systems reduce these substances in your water:

- Iron
- Rust
- Sediment
- Excess Chlorine Odor
- Hydrogen Sulfide – Rotten Egg Odor
- Manganese
- Benzene
- VOC's (Volatile Organic Chemicals)
- PH Adjustment

The Autotrol® Brand Performa™ Filter Control Valve

The Autotrol Performa filter control valve is the leader in high-performance residential control valves. This control's exceptional flow rates ensure that you have enough water flow for that long shower and to keep up with your growing family, all with no regular maintenance on the system! The Performa valve features DuraFlow™ valve-disc operation, which seat in a vertical position and do not etch. This valve type does not leak, because the valve seal is held closed by water pressure.

The 760/762 Demand Control

The most sophisticated control on the market, the Autotrol brand 760 demand control gives your water treatment dealer the ability to set parameters which allow for the control to match your exact water needs. This environment-friendly control ensures you years of filtered water.

- Guest regeneration button to easily initiate a manual backwash.
- Power back-up and NOVRAM smart-memory retains all of the settings in the event of a power failure.
- Low-voltage power source is safe to use in your home.
- Calendar override automatically regenerates the system at a time interval you select if usage has not initiated a regeneration.
- Solid-state electronics guarantee many years of use.

The 740/742 Time-Clock Control

For many applications, the 740 electronic time-clock control is the perfect choice for regenerating at predetermined time intervals. The solid-state construction ensures years of trouble-free performance. You never need to worry about your water system again with the 740 time-clock control.

Premium-Quality Drinking Water

Combined with a water conditioner system, a home Reverse Osmosis (RO) or filtration system provides your family with purer, better tasting, drinking water.

You no longer need to buy expensive bottled water at the store or have it delivered to your home. Pure, fresh, water is available right at your kitchen tap. Ask your professional water treatment dealer about quality Reverse Osmosis or filtration systems utilizing industry-leading components.

The Whole Home Water Treatment System

Quality water is a necessity for today's active family. Better quality water is not only more healthy, but it will also make you more comfortable as well as save you money in the long run. Pictured is a typical complete home water system. Configurations may vary by region and water needs. This system includes a complete whole home media filter system, a water conditioner and a quality drinking water filtration system. Ask your dealer about a water test to determine what components your home needs.
